

REQUEST FOR PROPOSAL RESPONSE

Orbit Digital

Procurement Request: Enterprise Digital Procurement Platform

Orbit Digital has substantial delivery experience and strong customer references. Pricing is mid-range, but the integration architecture and detailed implementation approach are less specific than competing proposals.

1. Executive Summary

Orbit Digital understands the requirement as a need for a secure, scalable and supportable enterprise platform. The proposed solution addresses application delivery, integrations, implementation governance, security and ongoing support.

2. Proposed Solution

- Cloud-based platform with configurable business modules.
- API integration is supported, with detailed interface design to be finalized during discovery.
- Scalability is described as elastic but without a specific concurrent-user target.
- Standard backup and monitoring services are included.

3. Implementation Approach

- Weeks 1-3: discovery and requirements
- Weeks 4-9: configuration and development
- Weeks 10-12: integration and testing
- Week 13: go-live

Team Structure

1 engagement manager, 1 architect, 3 engineers, 1 QA engineer and shared security resources.

4. Commercial Proposal

Item	Proposal
Implementation	■1.30 crore implementation fee
Annual support	estimated annual support ■20 lakh. Integration changes beyond discovery are subject to change control.
Assumptions	Standard scope included; changes handled through agreed change control.

5. Security, Compliance and Risk Controls

- Encryption at rest and in transit.
- Role-based access and centralized logging.
- Annual security assessment is proposed.
- The proposal provides general control descriptions but limited audit evidence.

6. Support and Experience

- 24x7 critical support.
- Four-hour response target for critical incidents.
- Dedicated customer success manager.
- Five customer references and several similar-project summaries are provided.

7. Risks and Open Items

- Integration architecture is comparatively vague.
- Final integration scope may be subject to change control.
- Security evidence is less detailed than the strongest proposal.

8. Supplier Statement

Orbit Digital confirms that the information in this fictional proposal is provided for evaluation purposes. Detailed contractual commitments, final technical design and due-diligence evidence would be finalized during procurement.

Synthetic training document — no real supplier or confidential information is used.
